

TOTAL ENGINEERED SOLUTIONS

CAPABILITY STATEMENT

COMPANY OVERVIEW

Clisby Engineering Pty Ltd is a broad based engineering company located in Adelaide and established in 1945. Clisby is a member of the Euroair Group of Companies that was formed by the expansion of Clisby into Asia in 1990. The group specialises in design, fabrication, sales and service of process and rotating equipment and has fabrication and engineering facilities in Australia, Malaysia and Indonesia with long term alliance relationships with international equipment providers.

PRODUCTS & SERVICES

Well Head Equipment: Design and fabrication of pressure vessels, separators, pipe spools, compressors, wellheads, filtration, flares, skids and condensate tanks complete with installation and facility testing.

Wellhead Compressors: Skid mounted, variable speed & pressure, designed to allow maximum wellhead CSG flow and to fully drain the coal bed reservoir down to 5kPa.

Pipelining: Composite, HDPE and steel pipeline, design, survey, civil, engineering, installation, hydro/pneumatic testing, rehabilitation and environmental services.

CSG Water Filtration Units: Wellhead filtration skids to capture debris, silica, and coal fines during the water extraction phase of CSG wells. Mobile, fully contained, self-cleaning unmanned units.

Wind and Solar Infrastructure: Survey, civil, cable and fibre installation, testing and termination.

Environmental & Remediation Services: Environmental Monitoring and Remediation Services to the Industrial, Private, Mining and Oil & Gas sectors to ensure compliance is met as required by regulation or environmental impact studies imposed on the Industry or by request of clients.

Fabrication Sales and Service: Air and gas compressors, topside infrastructure, control and process instrumentation, industrial and explosion proof, low pressure, high pressure, desiccant dryers, filtration and nitrogen generators.

PRODUCTS & SERVICES

Fuel Storage: Above and below ground, double wall self bunded and single wall, unmanned portable, multiple products and tank farms from 1000l to 200,000l compliant to UL and Australian Standards.

Power Generation: Diesel and Biogas, 200 – 1500KVA, open skid, sound attenuation, design, fabrication and commissioning

MANAGEMENT

Hamish Findlay Business Development and Manufacturing

Penny Pang Finance

Darcy Nielsen Project Management, wellhead, pipelining and environmental services

Tracy Tan Administration

The Group is active in medium scale engineered turnkey projects and has recently completed fabricated projects to:

Petronas, Total, Chevron, Exxon, Shell, QGC, Petron, Petro Vietnam, Alstom, MTU, Beach Energy, Santos, Wood Pressure Group and GE.

SAFETY & QUALITY

The company is committed to safety and quality and within the group structure is certified with ISO 9001 & ISO14001.

All business activities meet or exceed the relevant Australian Standards and offer products and services in compliance to a variety of international standards including ASME, API, BS, JIS & UL including compliance to all North American Oil Field Services standards. Clisby is a registered supplier with Achilles.
